Concurrency Review

Sanitary Sewer and Potable Water Facilities	The City of Port St. Lucie Utility Systems Department will provide water and sewer service. A developer's agreement with the City Utilities Department, that is consistent with the adopted level of service, is required prior to issuance of building permits.
Traffic Circulation	The Veranda Oaks transportation impacts to Becker Road are addressed within the fourth amendment to the development agreement (P18-115). This amendment included a transportation impact analysis that details the roadway section will support the traffic generated by up to 2,039 single family units and 300 multi-family mid-rise units (a net reduction of 691 units from the 3 rd amendment); which results in 1654 peak hour net external two-way trips. With the completion of the required improvements (detailed below in Related Projects) adequate capacity is available to support the development.
Parks and Recreation Facilities	The PUD and development agreement require the applicant to provide for 20 net usable acres of for parks and recreation facilities. The Veranda PUD is providing for the 20 net usable acres through the creation of a linear greenway, along Becker Road, and where abutting the Veranda developments. The linear park proposed will be publicly accessible and allow usable park space for Veranda developments.
Stormwater Management Facilities	The project includes paving and drainage plans which meet the required level of service.
Solid Waste	Solid waste impacts are measured and planned based on population projections on an annual basis. There is adequate capacity available.
Public School Concurrency Analysis	Per Policy PSFE 2.4.1 of the City's Comprehensive Plan, Public School Facilities Element, approval of the final plat is subject to the availability of adequate school capacity based on the adopted level of service standards.
