This steel sculpture uses a series of increasing triangular facets to create a geometric form. Each face catches light in a unique way because it is at a different angle relative to the others. They reach skyward defying gravity.

Artists contacted for revised proposal

September 5, 2024

Proposal Revision Process

- 1. On September 5, the artists were contacted about the path to revised concepts for review.
- 2. Each of the three (3) finalists were given the *option* to submit a concept revision by October 6, 2024. The artists each signed an MOU outlining the terms and conditions for this process.
- 3. Artists received an additional honorarium of \$500 for their revised concept.
- 4. The artists reviewed the additional context in Exhibit A of the MOU, which contained detailed, additional context to inform their revised concept. If an artist did not consent to submitting a revised proposal, then their original concept would be re-considered. The RFP parameters were still applicable, but would be expanded with the additional context packet.
- 5. The Selection Committee independently reviewed each of the revised concepts and score them quantitatively based on the selection criteria between October 7 and October 11, 2024.
- 6. The Selection Committee discussed the rankings on October 11, 2024.
- 7. On November 4, 2024, the ranked revised concepts will be shared with PAAB for their review and subsequent motion.
