**LIST OF AMENDMENTS**

The following changes to the previously approved Verano South Pod D PUD are proposed in Amendment No. 3: (P20-214)

- To update Exhibit 9a, the PUD Concept Plan, to match the latest design on the Phasing Plan.
- To update Exhibit 5, Site Information.

The following changes ~~to the previously approved~~ were approved in Verano South Pod D PUD ~~are proposed in~~ Amendment Number 2: (P20-060).

- To amend Site Information and change side setbacks from 6' to 5' for the Single-Family lot types larger than 50'.
- To amend Pod layouts to illustrate side setback reduction from 6' to 5'.
- The addition of a Villa Lot Size with a 25' minimum (Typical Villa Lot 50' and greater).
- Condensing the number of lot typicals to show the 40' and 50' lot as typical minimum, as long as 5' setback is met.
- Amending language to clarify that Air Conditioning, Pool Equipment, and Generators are necessary support equipment rather than accessory uses, and as such are allowed in the setback area.
- Formatting minor changes throughout the document, such as centering and underlining headings and refitting text on pages.
- Updated the PUD Amendment Application to reflect the new address of the Owner, Verano Development LLC.
- Added a parking option for single car garages which would require one tandem guest parking space in the driveway. This is not a proposed reduction in parking, rather a proportional parking requirement depending on size of garage. Justification from the Traffic Engineer is included in the PUD.

## **EXHIBIT D**

### **INTRODUCTION**

The comprehensive area of the Verano DRI (formerly known as the PGA Village/Montage DRI) is approximately 3,000 acres. It is to be located southwest of the existing PGA Village/Reserve, west of I-95, and east of Glades Cut Off Road. The SFWMD C-24 Canal traverses directly through the northeastern section of the property. Verano as a whole is designed to include Multifamily and Single-Family Residences with Golf Courses, Commercial Development, Open Space, and Country Club amenities.

The overall average density of the Verano DRI shall not exceed 2.2 du/ac. Verano South Pod D is a residential development of single-family homes and attached villas, and consists of approximately 298.73 acres. The proposed Pod D site borders the C-24 Canal to the north and vacant land owned by Verano Development LLC to the south. The site can best be described as a residential community under development. Although the average density for the Verano DRI as a whole shall not exceed 2.2 du/ac, Pod D is designed with a maximum residential density of 2.35 du/ac. The Verano DRI will include a variety of land uses including office commercial, retail commercial, residential single-family, residential multifamily, light industrial, upland preserve, golf course and open space. Pod D is to be residential development. The residential component will be single-family detached lots and single-family attached villas. Pod D will be supplied with water and wastewater services by the City of Port St. Lucie Utilities Department and will comply with all applicable City Ordinances, Policies, Specifications, and Regulatory Agencies governing such service. Wastewater services will be provided by the Glades Wastewater Treatment Plant upon completion and startup. By utilizing a combination of the various available service options to meet the wastewater needs at each phase of development, sufficient service will be available from these entities for the entire proposed development.

Access to Pod D will be provided by Lunata Way and a future Pod A road. Both of these connect to Appian Way, which is the primary access for all of Verano South via the C-24 bridge. Future internal connections will be implemented throughout the DRI, and there will be at a minimum two access points into the Pod at all times: one (1) primary access and one (1) emergency access. Storm Water Management will be provided by an on-site system of lakes, currently under review by the South Florida Water Management District (SFWMD). A Conceptual Environmental Resource Permit (ERP) has been issued for the proposed project from South Florida Water Management District (SFWMD). The permit number is 50-01645-S. A conceptual drainage design was included as part of the application. Although Pod D does not contain significant upland preserve, all upland preservation, recreation, and open space requirements of the PUD will be met within the comprehensive Verano DRI requirements.

**(PLEASE SEE PAGE 18)**

**EXHIBIT 6**  
**PROPOSED DEVELOPMENT USES/STANDARDS**

**1. PERMITTED PRINCIPAL USES**

**A. RGC (Residential/ Golf Course) LAND USE AREA:**

1. Single-Family Detached Residences, Villas (Duplex subdivided on individual lots)
2. Temporary Construction Trailers
3. Model Homes
4. Lakes
5. Recreation Facility and Maintenance Facility
6. Entry Gates and Guard House.
7. Temporary Sales and Design Center

**2. DENSITY:**

2.35 du/ac.

**3. PARKING REQUIRED:**

**RGC Land Use:**

All single-family units shall have at minimum a 2-car garage, with 2 guest parking spaces located in the driveway or elsewhere in the community. Single car garages are permitted. Units with single car garages will have parking for one (1) space in garage and one tandem space in driveway.

One (1) space per 200 square feet of Recreation Facility/Clubhouse/Mail Kiosk. On-street parking may be utilized to satisfy this requirement.

Driveways will be up to 20' wide at the right-of-way. Past the right-of-way, driveways can extend up to 30' in width to accommodate a three-car garage.

**4. STREET DESIGN:**

Corner radii of intersecting street shall be a minimum of twenty-five feet (25').

**5. MAXIMUM BLDGHEIGHT:**

Maximum height of residential structures and recreation centers shall not exceed thirty-five Feet (35') above finished grade.

**6. MINIMUM LOTSIZES: (See Exhibit 11 Typical Lots)**

Lot sizes are not restricted to the typical plans, provided they adhere to the setback requirement.

**9. MINIMUM BLDG SETBACKS: (See Exhibit 11, Typical Lots)**

**Single-family:** Minimum setbacks shall be as stated below unless otherwise indicated. Side setbacks apply to buildings and accessory structures. Refer to section 11 on the following page. Roofs are allowed to overhang into building setbacks not to exceed 24”.

Front Setback:

Each lot shall have a front setback line of thirteen feet (13’) from a dwelling’s living area or a side entry garage, and eighteen feet (18’) to a front entry garage.

Side Setback:

Side setbacks apply to building and accessory structures. Each lot shall have a side setback of five feet (5’). A side setback of zero feet (0’) shall be allowed on a zero-lot-line provided that a minimum building separation of ten feet (10’) is maintained between units. Accessory structures are allowed within the side setback and shall have a minimum setback of 2 feet from the lot line. Any accessory structure placed within the side setback must be landscaped to be shielded from the right-of-way. If adjacent to an open space tract five feet (5’) in width or greater, the side corner lot setback can be reduced to five feet (5’).

Side Street Setback:

A side street setback of fifteen feet (15’) shall be provided adjacent to rights-of-way. If adjacent to an open space tract fifteen feet (15’) in width or greater, the side corner lot setback can be reduced to five feet (5’). Accessory structures are allowed within the side setback and shall have a minimum setback of five feet (5’) from the lot line.

Rear Setback:

Each lot shall have a rear setback with a building setback line of ten feet (10’). There shall be a three foot (3’) setback requirement for accessory structures. If adjacent to a lake, open space, or common area tract, the setback for accessory structures shall be zero feet (0’).

Notwithstanding the foregoing, sand set pavers may encroach into the setbacks up to the property line provided that all other requirements have been met or waived.

**Villas:** Minimum setbacks shall be as stated below unless otherwise indicated. Roof encroachments are allowed to overhang into building setbacks, not to exceed 24 inches (24”).

Front Setback:

Each lot shall have a front setback of eighteen feet (18’).

Side Setback:

Each lot shall have a side setback of five feet (5'). Accessory structures are allowed within the side setback and shall have a minimum setback requirement of three feet (3'). A minimum of ten feet (10') shall be maintained between buildings. Any accessory structure placed within the setback must be landscaped to be shielded from the right- of-way.

Side Street Setback:

A side street setback of fifteen feet (15') shall be provided adjacent to rights-of- way. Accessory structures are allowed within the side setback and shall have a minimum setback of five feet (5') from the lot line.

Rear Setback:

Each lot shall have a rear setback of ten feet (10'). There shall be a three foot (3') setback requirement for accessory structures. If adjacent to a lake, open space, or common area tract, the setback for accessory uses structures is zero feet (0').

Notwithstanding the foregoing, sand set pavers may encroach into the setbacks up to the property line provided that all other requirements have been met or waived.

**10. FENCES / WALLS:**

**Single-Family:**

~~Decorative and non-decorative f~~Fences and walls may be located along the rear and side property line, but they shall not extend into the front setback. These fences and walls may have a maximum height of seven feet (7'). In addition, within the front and side setbacks of the lot, a ~~decorative~~ fence with a maximum height of three feet (3') may be provided.

**Villas:**

~~Decorative and non-decorative f~~Fences and walls may be located along the rear and side property line, but they shall not extend into the front setback. These fences and walls may have a maximum height of seven feet (7'). In addition, within the front and side setback of the lot, a ~~decorative~~ fence with a maximum height of three feet (3') may be provided.

**11. ACCESSORY USES:**

Accessory Uses/Structures are permitted in connection with any principle use provided that all accessory structures or uses are in full compliance with all setback, height and building coverage. Approved uses include but are not limited to patios, outdoor cooking areas, gazebos, pool equipment, and screen enclosures. \*

\*A/C Units, Generators, and pool equipment are considered support uses and are allowed inside yard setbacks

## 12. LANDSCAPING:

### **Overall:**

No more than 50% of the required trees on single-family lots may be palm trees. A minimum of 25% of all required trees shall be native species. Landscaping within this PUD is subject to the regulations of the City of Port St. Lucie Code of Ordinances, Chapter 154, unless regulations are otherwise stated in this document.

### **Easement and Utility Area Landscaping:**

No trees may be planted within ten feet (10') of any existing Port St. Lucie Utility Systems Department (PSLUSD) infrastructure, utility pole, guy wire, or pad mounted transformer. No protective barriers are required.

### **Landscape Buffer Strips:**

No wall shall be required adjacent to open space land unless it is Open Space Conservation.

### **Common Area Landscaping:**

The minimum perimeter landscaping for common areas, amenity centers, model centers, and mail kiosks will be an average of five feet (5') from the property line. When street trees are present adjacent to common areas, amenity centers, model centers, and mail kiosks, the street trees shall count towards the perimeter tree requirement and additional shade trees will not be necessary, so long as the street trees are no more than fifteen feet (15') from the property line. Smaller trees and hedges shall still be required. Landscaping will be provided in keeping with the desired community aesthetic.

### **Single-Family:**

1. Lots less than 6,000 sf shall provide two (2) trees
2. Lots from 6,000 to 7,500 sf shall provide three (3) trees
3. Lots over 7,500 sf shall provide four (4) trees

Trees to be placed in the front yard of a unit may be substituted with street trees to be planted within the adjacent right-of-way. Street trees will be planted at the time units are being built. Perimeter landscaping along lakes for residential homes will not be necessary nor are they prohibited.

### **Street Trees:**

Large Canopy Street trees shall be provided on a basis of one (1) tree per forty (40) linear feet of roadway per side. Tree spacing can be adjusted as necessary but shall not exceed fifty (50) feet on center as per city ~~landscape~~ Subdivision code. Street trees planted in front of residential lots may be counted towards the canopy tree requirements for the lot.

### **13. CLUBHOUSE/RECREATION:**

#### **Permitted Uses:**

Pool, Hot Tub, Cabana, Conference Facilities, Health Club, Outdoor Sports Facilities, Tot lot, Passive Garden Area, Golf Cart Parking Spaces, Racquet Club Facilities, Fire Pits, Outdoor Cooking.

#### **Minimum Building Setbacks:**

Front Setback: The minimum front setbacks for amenity centers and clubhouses shall be of ten feet (10').

Side Setback: The minimum side setbacks for amenity centers and clubhouses shall be of five feet (5').

Rear Setback: The minimum rear setbacks for amenity centers and clubhouses shall be of five feet (5').

#### **Landscape:**

Screening amenity centers with perimeter landscaping and providing Vehicle Use Area (VUA) landscaping will be subject to the approval of the Site Plan Review Committee on a case by case basis. A minimum average of five feet (5') is required for most all perimeter landscaping. One (1) tree per parking island will also be required. Parking islands will be provided to facilitate a landscape design that is in keeping with the desired community aesthetic. Certain vistas to lakes, open space, and natural areas are subject to landscaping/buffering requirements with opportunity for uninterrupted views of these vistas. The same amount of landscaping that is required per City Code will be provided in these buffers, however this PUD provides opportunity to provide open vistas where no landscaping will be placed up to a maximum of fifty percent (50%) of the buffer length. Landscaping may instead be grouped on at least half of the buffer length.

### **14. MODEL ROW AND SALES CENTERS:**

Model homes and their respective sales centers are permitted within this PUD. If the location of model row is not shown on the Conceptual Master Plan (Exhibit 9a), it may be permitted within the PUD through site plan review and model home applications, without warranting a PUD amendment. Temporary trap fences are permitted in model row. These trap fences intend to prohibit vehicular access within model row but will allow access to emergency vehicles through an emergency lock.

Street furniture and shade sails are also allowed within model row per site plan application, including within rights-of-way, so long as they do not unreasonably interfere with traffic. This will enhance the pedestrian experience while visiting model row. Street furniture and shade sails may remain after models

have been sold as single-family homes.

**15. ELEVATIONS:**

~~No two same residential elevations shall be adjacent to each other on the same side of the street. This applies to residential units. This does not apply to facades. A same or similar elevation is permissible across the street.~~ Townhouses, apartments, multifamily (excluding duplexes), commercial, office, and institutional uses will follow the Citywide Design Standards. Single-family, Villa (duplex), model homes, residential amenity centers, clubhouses, and guardhouses are not required to follow the Citywide Design Standards.

**16. UTILITIES AND PUBLIC WORKS:**

All construction shall be in accordance with the City of Port St. Lucie Utility Systems Department's Technical Specifications and Construction Standards, latest revision, and with all applicable Florida Department of Environmental Protection rules and regulations.

The subject PUD will be supplied with Water and/or Wastewater Services by the City of Port St. Lucie Utility Systems Department (PSLUSD) and will abide and comply with all the applicable City Ordinances, Policies, Specifications and Regulatory Agencies governing such services.

Pump Stations will be designed to serve neighboring parcels to maximize the benefit to the system and minimize maintenance costs to the City.

The Applicant acknowledges that the City may require reuse water to be utilized for irrigation, equal to the amount of wastewater generated by the project.

No vegetation with intrusive root systems vegetation shall be placed within ten feet of utilities. All utilities shall be placed underground.

Trees shall not be planted within 10 feet of any PSLUSD mains or appurtenances. All other utilities shall be a minimum of 5' horizontal separation from city utility mains for parallel installations and a minimum of 18" below city utility mains (all measurements are from outside to outside). Fiber Optics necessary for communication to the lift station and reuse metering stations will be required. Fiber optics must be installed at a minimum of five feet (5') from all other mains and utilities.

No landscaping shall be placed in a manner that would create conflicts with the intended operation and maintenance of any existing or proposed water/wastewater utility lines.

Berms and structural landscape features such as rock, foundations, sculpture, decorative wall and tree wells are generally not allowed in PSLUSD easements, but may be reviewed on a case by case basis.

All measurements are from outside to outside, not centerline to centerline. Example: outside of pipe to nearest point on tree trunk.

No landscaping other than sod grasses may be planted within a 5' radius maintenance area of any above ground PSLUSD appurtenance such as water meters, backflow devices, fire hydrants, sanitary sewer cleanouts, and manholes, air release valves, or fiber optics pull boxes.

All landscaping within PSLUSD easements shall comply with PSLUSD technical specifications, policies, and codes.

The property owner, contractor, and authorized representatives shall provide pickup, removal, and disposal of litter within the project limits and shall be responsible for maintenance of the area from the edge of the pavement to the property line within the City's right-of-way in accordance with City Code, Section 41.08 (g).

This traffic Statement was prepared for the proposed masterplan, Verano C-24 South, within the approved Verano Development of Regional Impact (DRI) and constitutes a portion of the DRI's second phase (Phase II).

The traffic impacts of this development were fully analyzed in the analysis included in the Application for Development Approval (ADA) for the DRI. The results of that analysis were used as the basis for the traffic conditions included in the Final Development Order for the Verano DRI.

As a part of this Masterplan, Pod E PUD 1 proposes 307 and Pod G proposes 200 dwelling units.

As previously reported to the City, the Phase I and II cumulative development potential is 3600 residential units; the Trip Generation potential for Phase II buildout is 55,518 daily, 3,860 AM peak hour (1,586 in, 2,274 out) and 5,117 PM peak hour (2,859 in, 2,258 out) trips, based on the trip generation projection included in the ADA Traffic analysis.

After internal capture with other uses within the DRI and pass-by capture, Phase II will generate the following net new external trips: 40,686 daily, 3,041 AM peak-hour (1,176 in, 1,865 out) and 3,750 PM peak-hour (2,175 in, 1,575 out) trips.

The proposed PUD within the Verano DRI does not warrant any changes to the previously approved transportation related Development Order conditions.

| Verano Phase | Development Area               | Dwelling Units |
|--------------|--------------------------------|----------------|
| 1            | Verano PUD (North of the C-24) | 1,200          |
| 2            | Verano South PUD 1, Pod A      | 286            |

DRAINAGE STATEMENT FOR  
 PUD D and E  
 October 16, 2018

The proposed project is a portion of the overall Verano DRI, were are proposing the next two PUD's along the south side of the C-24 just across from the existing Verano development on the North side of C-24 canal. The proposed PUD's are just north and west of existing PUD A and B.

The project is under an existing SFWMD conceptual permit #50-01645-S (application #170530-4). Basin assumptions will follow the criteria set in the original conceptual permit. The proposed drainage system throughout the proposed PUD's will consist of a network of pipes and catch basins interconnecting the roadways to the proposed onsite lakes. The neighborhoods will also provide for the required lake interconnect pipes which will be consistent with the SFWMD permit. Water quality will be achieved within the lake.

As the overall property is developed lakes and ditches will be constructed to provide sufficient attenuation of run-off at various stages of the project until the overall lake and drainage system is complete.
