**The Traditional Regional Park, BICYCLE TRAFFIC GARDEN will teach kids the rules of traffic flow and how to bike on public streets safely. They can learn what all the lines and signs on the streets mean and get comfortable navigating them all in a car-free space. Schools in the area can also use the park for physical education courses. And perhaps parents will have more peace of mind when their kids hop on their bikes and pedal off to a friend's house knowing their child has practiced the rules of the road.**
