Synagro South, LLC does not have any violations within the past two years.

Company Profile

In addition, we provide final product distribution as a key component of many of these projects. A team of nine Product Sales Representatives is responsible for successfully annually managing about 300,000 tons per year of AllGro® compost and 170,000 tons of Granulite® fertilizer (heat dried biosolids). We have unrivalled understanding of the markets for these products and continuously work to broaden the suite of outlets for these materials; as an example, Synagro pioneered the use of heat dried biosolids as an alternative fuel resource in cement manufacturing. When Synagro operates a facility, we include product distribution services in our operation; however, we are also willing to work with municipally operated facilities to assist in managing their products.

In December 2020, Synagro was acquired from EQT, a Swedish private equity firm by West Street Infrastructure Partners III, an infrastructure investment fund managed by Goldman Sachs Merchant Banking Division. Founded in 1869, The Goldman Sachs Group, Inc. is leading global investment banking, securities and investment management firm. Goldman Sachs Merchant Banking Division (MBD) is the primary center for the firm's long-term principal investing activity. MBD is one of the leading private capital investors in the world with investments across private equity, infrastructure, private debt, growth equity and Real Estate.

Company Profile

Synagro's core business is the environmentally sound and economically viable management of municipal biosolids, including project development, operations, and biosolids product distribution. Through this focus Synagro has grown to be North America's leading provider of high-quality, cost-effective biosolids management and beneficial use solutions. We have been successfully meeting the biosolids management needs of hundreds of generators for more than 40 years. Synagro's experience in all areas of biosolids management is unparalleled.

Synagro annually manages over 12 million tons of biosolids and other organic by-products for more than 650 generators (including 600 municipal clients). Synagro employs a team of over 750 professional engineers, soil scientists, agronomists, construction managers, financial managers and the largest, most diverse operational staff in the industry. Our team is dedicated to working with our clients to find the right solution to their organic residuals management challenges. Synagro, and its various subsidiaries, have been at the forefront of the environmental movement to safely process and market organic residual materials for beneficial uses.

Synagro owns no proprietary technology which enables us to offer nearly all commercially viable processing options and product marketing channels for biosolids and organic residuals and allows us to develop projects that fit a municipality's unique needs. Our breadth of experience developing, building, financing as necessary, and operating and maintaining the complete range of biosolids options list below is unique to Synagro.
