KEITH

City of Port Saint Lucie RFQ#20230097 Request for Qualifications for Continuing Contracts For Survey & Mapping Services

September 22, 2023

Dear Selection Committee Members,

It is with great pleasure that Keith and Associates, Inc., dba KEITH, provides the City of Port St. Lucie ("the City") our submittal for your Continuing Contracts for Survey and Mapping - RFQ 20230097. The City is the largest municipality in St. Lucie County, covering nearly 120 square miles adjoining South Florida's coast and serving the needs of more than 500,000 residents. The City's Strategic Plan vision focuses on Seven Goals that strive to deliver safety, connectivity, diversity, culture and government performance to your residents and visitors. For nearly five decades, KEITH has supported Florida's local governments with multi-disciplined consulting services that directly align with these core values. We are excited to bring our passion, commitment, and expertise to the City on this critical contract for Surveying and Mapping Services.

With 40 municipal parks, an evolving and vibrant Downtown District, City operated marina and golf facilities, and transportation infrastructure that must be upgraded and maintained to support a connected and inclusive community, your infrastructure needs are diverse and challenging. As a coastal community lying at an average elevation of nine feet above sea level, the impacts of climate change and sea level rise are seen and felt by your residents directly. Over the potential five-year service period of this contract, you'll need a proactive, experienced, and innovative geospatial and surveying consultant to support City staff as you address these challenges.

As one of the veteran trans-disciplinary consulting firms in the community, KEITH is extremely qualified to meet your needs in this regard. Throughout KEITH's history, we have been awarded over 100 continuing service contracts with local and State governmental agencies across Florida as a prime and sub-consultant. This wide-ranging experience has provided our team with a comprehensive understanding of the infrastructure and planning support needs of municipalities like yours. From your foundational redevelopment initiatives at City Center, East Lake Village and Southern Grove, to your transportation and mobility connectedness objectives, to your public health and safety focus, our innovative and cost-conscious surveying and geospatial solutions will drive value on any of the wide variety of projects we may be tasked to support over the course of this contract.

Our experience with continuing services contracts of nearly identical nature to the current solicitation provides the City with a Team that will hit the ground running. Our partnering approach focuses on building and maintaining long term relationships with City staff and stakeholders. Moreover, our superior service and team commitment has led to multiple repeat selections by these agencies. We were recently awarded our third consecutive continuing engineering support contract with Broward County Aviation Division, our third consecutive surveying and mapping contract with the South Florida Water Management District, and our third consecutive surveying & mapping contract with FDOT District 6. As you'll see, KEITH is a local and woman-owned business that punches well outside its weight class.

KEITH's family ownership has proudly called Florida home for over sixty years, providing transportation engineering, planning, civil engineering, surveying, landscape architecture, and construction management services. Our involvement in the community extends well beyond our various professions, as we are active in various organizations on a philanthropic and community support level. This support is witnessed in the time, talent, and treasure that KEITH continues to give back to South Florida communities. This contract will be serviced and administered from our Port St. Lucie office location at 6913 LTC Parkway, only 20 minutes from your office. This proximity allows our team to simply "stop by" to discuss upcoming assignments or ongoing work with city staff and stakeholders as needed. Our Project Manager, Luis Santaliz, PSM, as well as his technical and administrative support team are residents of the City and therefore invested in the successful outcome of the projects we'll support over the course of this contract.

We understand that surveying and mapping is an intensely local profession, requiring specific knowledge and experience in a region to ensure the appropriate sources of project information are reviewed and exploited to achieve a correct project outcome in the shortest possible time. These include publicly available documents such as certified corner records, plats and legal documents, city as-builts or utility permits, but also may include records from local private sector surveyors that practice throughout your jurisdiction. Our leadership roles in the Florida Surveying and Mapping Society and our commitment to the surveying profession have led to strong relationships with surveyors of all practice specialties throughout Florida, including many of those that call the City home. Our experience throughout St. Lucie County, combined with our specific discipline knowledge and extensive support of municipalities with needs similar to your own, translates into an absolute minimal learning curve which can save the City precious resources, including time and money. Our Team's leading-edge technical resources, including mobile LiDAR, UAS-airborne LiDAR, and unmanned hydrographic survey systems will drive additional quality and value into each assignment we receive. Our firm was founded by a Professional Surveyor and Mapper, is led by a Professional Surveyor and Mapper, and is committed to remaining at the absolute forefront of the Surveying and Mapping industry as it continues to evolve.

The team of professionals at KEITH bring decades of experience with an emphasis on government, multi-tasked contracts, providing the leadership to effectively execute this continuing services contract and exceed your expectations. We bring to you the personal commitment of ourselves, our firm, and our long-standing reputation of accountability and excellence with municipalities and agencies throughout Florida. I am confident in our proposed team, and we will commit to execute every assignment to your satisfaction by bringing an excess of experience, expertise, and the resources to perform any scoped assignment, without exception. Finally, I bring you my personal commitment as CEO and the principal owner of the firm to become your "go-to" consultant for surveying and mapping services now and in the future.

Best Regards,

DODIE KEITH-LAZOWICK, PLS

CEO and Principal-in-Charge 6913 NW LTC Parkway Port Saint Lucie, FL 34986 772.405.3959

DKeith@KFITHteam.com

For more than six decades, KEITH has been providing geospatial and design solutions throughout the State of Florida, the Caribbean, and beyond. Our firm was built on the basic principle of serving as an advocate for the communities in which we build, we live, and we give back to. As a trans-disciplinary firm, KEITH provides creative solutions to each project and the communities in which they serve. The firm provides resilient and sustainable design solutions for municipal agencies, private clients, and the Florida Department of Transportation.

As a mid-size close-knit firm of over 190 professionals, KEITH provides surveying and mapping, subsurface utility engineering, planning, civil engineering, transportation engineering, landscape architecture, construction management services. KEITH has collaborated with more than 100 municipalities throughout Florida. Through our work, we create the stage for everyday moments; expected and unexpected. Our holistic development solutions carefully blend technical expertise with creative problem-solving; а rightand left-brained approach, or what we call Engineering Inspired Design.

KEITH engages as an extension of our clients, with an analytical lens and a goal to resolve development issues in a collaborative way; one that goes beyond the disciplines we provide. KEITH takes what might be considered mundane and transforms it by considering it through our

unique lens, reshaping each project so that it's more than just functional, it's sustainable.

Looking toward the future is best done with a sound knowledge of the past. Through founder Bill Keith's leadership, years of discipline and hard work, Bill was able to pass forward a growing enterprise to his daughter, our CEO, Dodie Keith-Lazowick, PLS. And in turn, KEITH has grown into a third generation of talent with our President, Alex Lazowick, PE, PMP, ENV SP. KEITH, constantly building upon our history, stands today as a trans-disciplinary powerhouse shaping communities across Florida and beyond with state-of-the-art and sustainable solutions to address all of the needs of our clients.

A TRANS-DISCIPLINARY APPROACH

KEITH is a rare gem. Each of its facets, the many disciplines we provide under one roof, is another unique benefit to our clients. All these professional disciplines are offered as an in-house service every day to you. We pride ourselves on the ability to work with municipalities, government agencies, and other consultants while providing close coordination with our clients. Having access to our own in-house, multi-disciplined team means we often solve problems within our own walls. Opportunities to confer interdepartmentally are indispensable. They give us insight to the biggest picture often resulting in the saving of time and budget resources.

GEOSPATIAL SERVICES

Surveying and mapping is a service that KEITH has offered its clients since its inception in 1998 and continues to be the foundation of our firm's portfolio of services. Although we have grown (technology resources and personnel), we have never lost our focus on the personal touch and customer services that our Founder. Bill Keith, was known for. KEITH has worked on thousands of surveying projects in South Florida over the last two decades. The Team has worked through a complexity of schedules, budgets, and programs to ensure the success of these projects is maintained. The KEITH Team has the blend of experiences to handle every aspect of the projects' needs from start to finish.

remains vision laser-focused maintaining our status as an industry leader in the comprehensive aspects that encompass the modern geospatial and surveying field. Surveying is no longer the simple science of manual measurement by angles and distances but, now encompasses a suite of complex data collection and analysis tools that must be related by knowledgeable professionals in the practice of modeling built and unbuilt environments. Further, these environments are not limited to upland locations and now include the subsurface, aerial, and underwater realms. Unmanned aerial systems (UAS) and autonomous hydrographic survey platforms have evolved also as valuable tools in the geospatial toolkit. KEITH continually invests in the leading-edge equipment and software that drive safety, efficiency, and quality into our surveying and mapping project deliverables.

Under the leadership and guidance of the Vice President of Geospatial Services and our Deputy Project Manager, Sam Hall, PSM, team members

continuously trained to implement innovative approaches and tools that allow efficient and safe data collection in any potential environment. By leveraging a comprehensive perspective and tremendous direct experience, the City will be assured that our recommendations on technology approaches will yield a "best value" deliverable to the specific assignment regardless of scope, location, or scale.

Finally, we recognize that the ability to selfperform specialized roadway data collection using mobile mapping, conduct any ASCE 38-02 quality level subsurface utility investigation, provide hydrographic surveys or UAS mapping assignments streamlining the project process, reduce coordination requirements, and provide sole source accountability for schedule and quality. KEITH brings this comprehensive ability to perform any potential assignment to the City. Our specific experience with each of these specialized service areas is summarized below.

Terrestrial Mobile LiDAR (TML): KEITH strives to improve safety, enhance mobility, and inspire innovation on each task. KEITH owns and maintains the Leica Pegasus 2: Ultimate TML sensor. This sensor is capable of delivering 2mm horizontal and 15mm vertical absolute RMS accuracies when calibrated to ground control targets - a critical necessity in meeting "design level" accuracies on South Florida's notoriously flat roadways. Data is collected at posted speed, greatly increasing efficiencies and providing dense LiDAR datasets that can be revisited for future use. The 360° "ladybug" imaging system provides 98% of a full sphere with "measure-inimage" coverage for asset collection, pavement assessment, ADA evaluation, and other potential tasks. Combined with the expertise of our TML team, this sensor provides the complete capability to rapidly deliver any potential TML assignment supporting transportation engineering design or as-builts, deformation monitoring, planning, asset collection, or corridor study.

Subsurface Utility Engineering (SUE) Surveys: The upcoming five years will be transformative for the Subsurface Utility Engineering (SUE) industry and South Florida municipal utility owners. KEITH's SUE Team is focused on the underground utility needs of our clients. In the past ten years alone, we have completed more than 2,000 successful underground utility detection and locating assignments at all existing ASCE CI/38-02 quality levels, including designation (CI/ASCE 38-02 Level B) of more than 2,000 line miles of existing utility facilities and more than 4,000 utility test holes and "soft digs" (CI/38-02 Level A). The KEITH SUE Team brings the extensive knowledge and solutions-oriented experience the City will need to address and eliminate utility concerns in the design phase, well ahead of construction.

Hydrographic Surveys: KEITH is now on our third-consecutive continuing contract with the South Florida Water Management District, whose mission is to manage and protect the water resources of the region and improve water quality for current and future generations. A central aspect of this mission is the design and maintenance of South Florida's canal and water control systems. As their consultant, we have provided extensive hydrographic surveying services utilizing a variety of manned and unmanned hydrographic survey vessels, as well as single-beam and multibeam sensors for nearshore waterbody modeling. Hydrographic datasets are merged with upland surveys to provide a comprehensive picture of the site or canal topography both above and below the waterline.

UAS-based Aerial Mapping: UAS or aerial drone technology is taking many industries by storm. The widespread implementation of these aerial platforms is changing everything, from the way we view sports or advertising to the ways we collect survey data and imagery. KEITH recognized the impact this tool may have on the surveying and mapping industry in 2014 and has continually made investments to remain at the forefront since then. We have multiple FAA Part 107 certified UAS pilots, and our software suite allows us to provide a wide range of deliverables. From 3D georeferenced imagery to designlevel survey data, to facility surveys, a UAS approach can yield cost savings while enhancing safety and schedule when implemented on the right projects.

	City of Oakland Park Citywide Surveys (Oak	land Park, Florida)	PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable)		
b.	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE Check if project performed with current firm Role: Project Manager. This series of surface and underground utility surveys supported the design, permitting and construction of safety and mobility improvements throughout the city of Oakland Park as funded by FDOT though the Local Agency Funding (LAP) program. Mobile LiDAR was used to map approximately 2-square miles of surface roadways. City right's of way were surveyed relative to existing plats, deeds of record, and FDOT and/or Broward county right of way maps. A full survey of drainage and stormwater facilities was also provided. Subsurface utilities were designated (ASCE/CI 38-02 utility quality level B / designation) and mapped throughout the project limits, and utility test holes (ASCE/CI 38-02 utility quality level A / locates) were performed at the location of proposed improvements that may be in conflict with existing facilities.					
	(1) TITLE AND LOCATION (City and State)	(/// / 51 //)		COMPLETED CONSTRUCTION (If applicable)		
	Districtwide Misc Location Survey Consulta	nt (Miami, Florida)	Ongoing			
c.	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE Check if project performed with current firm Role: Project Manager/Principal-in-Charge. KEITH is providing location survey services for FDOT D6 in an effort that is vital to planning, analysis and assessment of the transportation infrastructure and natural features throughout the District. Most of these services will utilize a combination of mobile surveying and mapping technologies with GNSS and conventional survey technologies for ground control, quality assurance, and supplementary topographic map data when necessary. The goal of utilizing mobile survey technology is to increase safety and cost benefit to projects through efficient collection and enhanced topographic information. It is further desired that mobile survey data will offer other value-added data to GIS, maintenance, and preliminary engineering.					
	(1) TITLE AND LOCATION (City and State)		(2) YEAR	COMPLETED		
	FDOT D4 Continuing Survey Services (District	ctwide)	PROFESSIONAL SERVICES 2020	CONSTRUCTION (If applicable)		
d.	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE Check if project performed with current firm Role: Project Manager. This was a five-year, \$5 million continuing contract that supported FDOT's in-house and consultant work program with district-wide surveying, mapping, and utility locating assignments. Services were provided on an on-call basis, and included baseline and right of way surveys, terrestrial and terrestrial mobile LiDAR, conventional surveys for design, hydrographic surveys, drainage surveys, cross sections, and bridge detail surveys. Right of way mapping assignments include R/W control survey mapping, R/W map preparation, Genesis mapping, sketches to accompany legal descriptions, and appraisal sketches. Utility locating assignments included ASCE quality level B (utility designating) and quality level A (utility test holes), records research, and coordination with utility agency owners.

b.	Surveyor. KEITH is providing location survey services for FDOT D6 in an effort that is vital to planning, analysis and assessment to the transportation infrastructure and natural features throughout the District. Most of these services will utilize a combination of mobile surveying and mapping technologies with GNSS and conventional survey technologies for ground control, quality assurance, and supplementary topographic map data when necessary. The goal of utilizing mobile survey technology is to increase safety and cost benefit to projects through efficient collection and enhanced topographic information. It is further desired that mobile survey data will offer other value-added data to GIS, maintenance, and preliminary engineering.

KEITH was recently selected to provide professional consulting services for civil engineering design, water and wastewater engineering, infrastructure asset management, and transportation engineering on a continuing basis. Scopes of service also include landscape architectural services and geospatial engineering including surveying and mapping and subsurface utility engineering. Contract amount varies - up to \$500,000 annually.

Mayfair Drainage Improvements:

The KEITH Team is providing geospatial and civil engineering services for stormwater improvements to solve regular flooding issues along Virginia Avenue and 4th Street. The KEITH Team is providing detailed surveying and mapping and subsurface utility engineering services, along with preparation of full engineering services, construction documents, permitting assistance, bidding assistance and CEI services. The drainage model will consist of the existing conditions of the project site's drainage basin utilizing SWMM (Storm Water Management Model) Software and will provide recommendations addressing conveyance problem areas including a stormwater analysis report, construction documents, specifications, and final inspections. Cost: \$164,960.00

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and cost) KEITH has served as the General Engineering Consultant for the City of Deerfield Beach for over 22 years and has been providing on-going engineering and surveying/mapping services.

Some projects provided under these service contracts include:

Parks and Recreation Projects: Highlands Park & Recreation Center, Sullivan Park/Kester Marina Development, Oveta McKeithen Recreation Center Improvements, Pioneer Park Improvements and Boat Ramp Improvements, Mayo Howard Park Surveys, City Hall Remodeling Project, Deerfield Beach Sand and Dune Stabilization Re-nourishment and Erosion Control, Deerfield Beach Boardwalk, Volleyball Courts, and Artificial Reef Improvements. KEITH's Involvement: KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering, and CEI services

from in-house staff for the design/permitting and construction management for all the above referenced projects. KEITH was the prime consultant on all these park projects and managed subconsultants for architecture, structural, electrical, and geotechnical engineering. All parks were City funded projects. The park projects varied in size from 1 to 10 acres and included new multi-purpose athletic fields, additional parking, nature trails, connectivity with other surrounding programmed spaces such as existing Intracoastal Waterway, walkways, bikeways, exercise trails, some parks included new buildings, pavilions, docks, public boat ramps and seawalls. KEITH assisted City staff in providing the required documentation and attending presentations to the associated granting agencies and Broward Boating Improvement Program.

Roadway Improvement Projects: Hillsboro Blvd and S.R. A1A "S-Curve" Beach Roadway Drainage and Beautification (Phase I and II), Hillsboro Blvd Streetscape Improvements and Utility Undergrounding, Ocean Way Streetscape and Drainage Improvements, Ocean Way Café Luna Improvements, Main Beach Parking Lot Improvements, The Cove Shopping Plaza, Parking Lot and Alleyways Redevelopment & Beautification, Intersection Improvement Design of Goolsby Blvd/Hillsboro Blvd., Intersection Improvement Design of Century Blvd/Hillsboro Blvd., SW 15th Street Roadway Improvements, SW 3rd Avenue Roadway Improvements -CEI LAP, The Cove Neighborhood - Traffic Calming Improvements,

Powerline Industrial Park Neighborhood Drainage Improvements (FEMA Funded), City-wide ADA Sidewalk Improvements (LAP and CDBG Funded), S.R. A1A Landscape and Pedestrian Safety Upgrades. KEITH's **Involvement:** KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering / Roadway Design, Landscape Architecture and CEI services from in-house staff for the design/permitting and construction management for all the above referenced projects. KEITH was the prime consultant on all these roadway projects and managed subconsultants for structural, electrical, and geotechnical engineering, as well as for public outreach. The roadway improvements included a wide range of projects from roadway assessments, milling and resurfacing, roadway widening to full roadway reconstruction to provide streetscape with landscape, hardscape, beautification features, new decorative roadway and pedestrian level lighting, streetscape furnishings, utility adjustments and overall stormwater, utility, and safety improvements.

Water and Sewer Improvement Projects:

Hillsboro Blvd and Intracoastal Waterway - Directional Drill Water Main, Hillsboro Blvd Water Main Extension, The Cove Neighborhood - Water and Sewer Improvements. KEITH's Involvement: KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering and CEI services from in-house staff for the design/permitting and construction management for all these projects water and sewer projects.

Cost: Contract amount varies - up to \$500,000 annually over 5-year contract.

KEITH has served as the General Engineering Consultant for the City of Pompano Beach for over 20 years. Some projects provided under these service contracts include:

Parks and Recreation Projects: North Pompano Park Improvements, Youth Sports Complex Improvements, Centennial Park Improvements, Municipal Golf Course. Dog Park, and Pier Renovations, KEITH's Involvement: KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering, Landscape Architecture and CEI services from in-house staff for the design/permitting and construction management for all the above referenced projects. KEITH was the prime consultant on these park projects and managed subconsultants for architecture, structural, electrical, and geotechnical

engineering. All parks were G.O. Bond funded projects by the City. The park projects varied in size from 4 to 20 acres and included new multi-purpose athletic fields (some natural and some artificial turf), additional parking, nature trails, connectivity with other surrounding programmed spaces such as existing ponds, walkways, bikeways, exercise trails, some parks included a new building and pavilions. KEITH assisted the City with construction management of their respective Contractor, which were selected as a Construction Management At-Risk.

Public Building and Facilities Projects: Fire Stations #11, #24, #52, #61, #103, #114, Pier Parking Garage, Ali Cultural Center, Charlotte Burrie Civic Center, Pompano Air Park Maintenance Building, Pompano Beach Branch Library Renovations, Condition Assessments for City Owned Buildings & Facilities, Municipal Facility Chiller Plant. **KEITH's Involvement:** KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering, Planning, Landscape Architecture, Bid Assistance, and CEI services from in-house staff. KEITH also aided with LEED BD+C rating documentation and processing.

Roadway Improvement Projects: Harbor Drive Beautification and Infrastructure Improvements, Pompano Beach Boulevard Streetscape Improvements, MLK Boulevard Streetscape Improvements, MLK Boulevard (Educational Corridor) Roadway Improvements, Old Pompano (Downtown Connectivity/Transit Oriented Corridor) Neighborhood

Improvements, S.R. A1A Streetscape Improvements and Utility Undergrounding, Pier Street Improvements, SE 8th Court and SE 9th Court Bridge Replacements. KEITH's Involvement: KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering, Landscape Architecture and CEI services from in-house staff for the design/permitting and construction management for the above referenced projects. KEITH was the prime consultant on these roadway projects and managed subconsultants for structural, electrical, and geotechnical engineering, as well as for public outreach.

Water and Sewer Improvement Projects: City-wide Reclaimed Water Distribution Main Extension Projects, NE 4th Street Reclaimed Water Transmission Main Extension, City-wide Force Main Replacement and Rehabilitation Project, MLK Boulevard Water Main Replacement and Upsizing Project, Old Pompano Area Water and Sewer Improvements KEITH's Involvement: KEITH provided complete Surveying, SUE, Utility Coordination, Civil Engineering and CEI services from in-house staff for the design/permitting and construction management for these water and sewer projects.

Cost: Contract amount varies – up to \$500,000 annually over 5-year contract.

KEITH provides general engineering, surveying and mapping, planning, and landscape architecture services to the CRA on an as-needed basis. Contract amount varies - up to \$500,000 annually.

Projects provided under this contract include:

Winfield Boulevard Traffic Claiming and Streetscape Improvements - This project included traffic claiming measures and streetscape improvements for the corridor of Winfield Boulevard from SR-7 to NW 64th Terrace, approximately 3,000 LF of local roadway. Scope items include schematic drawings of existing conditions, concept drawings including three alternatives considering potential lane width modifications, landscaping, potential pavement enhancements, lighting, the introduction of roundabouts, and other improvements aimed at traffic calming, cost estimates, design, permitting, and construction documents. This also included project coordination and community workshops. Cost: \$62,713.00

Colonial Drive Traffic Calming, Pedestrian Routing, and Streetscape Improvements - Phase 1: Phase 1 of traffic calming, pedestrian routing, and streetscape improvements containing approximately 500 LF of Local Roadway. The scope entails schematic drawings of existing conditions, concept drawings, including two alternatives considering potential lane width modifications, road geometry adjustments, landscaping, street lighting, potential pavement enhancements, improvements aimed at enhancing pedestrian crossing experience on Colonial Drive, and traffic calming, cost estimates, coordination meeting with Northwest Regional Hospital and MCRA staff and public workshops, if necessary. Cost: \$50,745.00

Atlantic Boulevard Streetscape Improvements – This project included streetscape improvements to a section of Atlantic Boulevard from S.R. 7 to NW 80th Terrace. Scope items included project coordination, landscape design, irrigation design, and maintenance of traffic plans. KEITH also assisted in the permitting, observation of construction and prepared maintenance guidelines and specifications to the CRA/City. Cost: \$93,000.00

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO	THIS CONTRACT (include scope, size and cost)	•	

KEITH provided surveying services in support of the proposed underground feeder route from the FKEC Jewfish substation to the endpoint in Ocean Reef Club. The route is approximately 11.5 miles and generally followed the existing overhead utilities on the east side of the pavement of County Road 905. This route survey focused on the following elements: recover and identify the right-of-way lines and property lines, as appropriate, locate the edge of pavement of the roadway together with above ground features such as structures, fences, driveways, etc., horizontally locate all utilities above and below ground, locating the established tree/vegetation lines, including any known special-use property delineations (wetlands, US Forest, etc.), and existing easements encumbering the route. A Digital Terrain Model (DTM) was created and contour lines were shown at one (1) foot vertical intervals. A spot elevation was also shown adjacent to each FKEC pole. Cost: \$208,930.00

24. BRIEF DESCRIPTION OF PROJECT AND RELEVAN	CE TO THIS CONTRACT (include scope, size and cost)	L	

This project consists of streetscape improvements along SR A1A from Sunset Lane to the Hillsboro Inlet. The improvements include the addition of landscaped medians, sidewalk widening (where right-of-way is available), street lighting, and landscape improvements. Services consist of survey; subsurface utility engineering; civil, traffic, and transportation engineering; landscape design, and construction engineering inspection for the proposed improvements. During early project coordination, it was determined that FDOT had an overlapping resurfacing project with the City of Pompano Beach's planned project. KEITH was able to coordinate to have the FDOT funds transferred to the City of Pompano Beach to increase the construction budget for the City's project. Cost: \$1,312,669.00

METHODOLOGY AND APPROACH

KEITH's extensive municipal experience has left our Team and Project Manager with a comprehensive understanding of the local needs of a contract such as this. After reviewing your most recent Comprehensive Plan, we feel our Team is ideally suited to deliver the critical surveying and mapping services that will support the ten elements of the Plan. Most importantly, we understand that our Team's mission throughout this contract will mirror your own: to provide exceptional municipal services that are responsive to our community while planning for smart and balanced growth that is managed in a financially responsible way.

Based on KEITH's decades of municipal experience throughout the Treasure Coast and South Florida, we believe successfully delivering on-call services requires a two-pronged management approach. This includes the overall contract management approach and the technical task approach to each work assignment. This section will address each of those aspects in detail.

MANAGEMENT APPROACH

- Constant communication: From initial receipt of the proposed work order through final deliverables, the City is informed of project progress. Issues or concerns requiring joint judgment are addressed as they arise. We pride ourselves on our small-firm feel while bringing large-firm capabilities to the table. Your team will interact with Project Manager, Luis Santaliz, PSM, as projects continue to progress. During periods of active work, Luis will provide a weekly summary of progress via email. KEITH will continually build trust through responsiveness, quality service, and on-time delivery.
- Safety: Florida's built and unbuilt environments can pose significant safety challenges during field operations. Everything from vehicular traffic to heat and humidity and Florida's "bugs and
 - critters" can affect and inform the safety plan of a project. Our priority is to safely execute your work, protect the public, and return our employees safely to their families each workday. We will present our formal Safety Plan to the City for approval after contract selection.
- Contract administration: Luis is an experienced Project Manager who has provided leadership on several previous continuing contracts for surveying and mapping services. He has direct City of Port St. Lucie and St. Lucie County experience and is highly familiar with Scope Development, cost estimating, progress reporting, invoicing, and project closure processes. Luis has made the City his home since 2018 and has provided quality surveying and mapping services throughout the region.
- Project Manager expenses are charged to the individual project. Invoices are promulgated monthly and will be charged on a percent complete (lump sum) or limiting amount (LA) basis as directed by the City. This simplifies the invoicing process and allows the KEITH team to review actual costs for individual project types throughout the contract, streamlining the cost estimation and negotiation process on future similar projects. Each invoice is accompanied by a progress report that correlates task completion percentage to the invoice, while time sheet backups are provided on each LA assignment. This provides transparency and confidence that our team's progress supports each invoice as required.
- **Scope Development:** All upcoming work requests will include a scope development meeting or call. This may be as simple as a brief Teams meeting for minor assignments, to a formal site

review meeting to walk a project and identify specific needs with those requesting the work. This prework, pre-negotiation interaction is the cornerstone in developing a comprehensive Scope of Work and eliminating "scope creep" in the form of unidentified required tasks. This is perhaps the most crucial step in meeting the City's needs on an assignment.

- Negotiations: Luis' depth of experience with similar assignments and municipal projects leaves him well aware of the level of effort required to achieve specific survey objectives on a project. Our strong focus on technology and innovation is intended to add value to the products we provide while reducing costs. Estimates are provided in Excel with a summary of hours per task by the responsible individual/party. With a clear scope, it is our team's objective to enter the negotiation process with all parties in close alignment on the level of project effort and associated cost.
- Project supervision: Our organizational chart delivers direct lines of communication from our field parties, surveyors, and technical leads to our Project Manager and through to the City's Project Manager. All team members are briefed on the Scope of Services, schedule, approach, and budget at the project kickoff meeting. Individual project surveyors are responsible for the totality of their project, and Sam is accountable for the overall schedule, quality, and project performance of the KEITH team to the City.
- *Innovation:* We intend to bring innovative approaches to the City that enhance the value of our services. Combining collection methodologies that may involve mobile LiDAR or UAS-aerial data collection, leveraging GIS in the survey production workflow, and cloud computing that allows our office technicians to review data in real-time are examples. Selecting the right data collection platform to achieve the scope of work while limiting the "time of project" to deliver early is our objective. Our crews are equipped with smartphones, tablet PCs, and WiFi mobile hotspots that blur the line between field and office. Our field teams can "FaceTime" senior professional staff to review field situations in real-time, while field data is delivered instantaneously to the office and calculations are delivered to the field via the "cloud" using Trimble Access.
- **Consistency:** We view each continuing contract as a program as opposed to a series of projects for a single client. A program is defined as multiple projects that are delivered according to established rules, standards, and criteria that are developed to meet the needs of the entity implementing the program. Our program approach provides a consistently present and professional product that can be leveraged by the downstream user with no required modification.
- Coordination of multiple simultaneous Work Orders: Every continuing contract management approach must address this challenge. A detailed understanding of the City's competing schedules is required, and each assignment will be scheduled to meet the City's work program schedule objectives in total. Our Critical Path Method database allows us to overlay all of the responsibilities of the KEITH Survey Division in a single exhibit, allowing Luis to identify and assign available resources to projects whose delivery is most near-term. The extensive depth of the KEITH Team's resources, and the availability of multiple highly qualified Project Surveyors / Task Managers facilitates our ability to handle multiple competing assignments.
- Representing the City to the public: We recognize that not all of the City's initiatives may be met with a positive response from the public, and surveyors may typically be the first to encounter

the public on a project. We must quickly and courteously inform the community members of our intentions and refer them directly to our Project Manager and/or City staff for further information.

TECHNICAL APPROACH

Our previous experience has shown that work orders can vary dramatically in scope and scale. Your jurisdiction extends from the beaches at Jensen Beach Park, through a series of inland waterways, to parks, public roads and alleyways, and city-building facilities like police stations, firehouses, and recreational facilities. The City's underground water and sewer systems are also a significant responsibility, and SUE surveys to locate these facilities may be a critical component of the contract. Surveys at any or all of these sites, above or below ground, may be required. The KEITH Team is prepared to support your maintenance, planning, and improvement initiatives at any City location in light of any proposed scope requirement with geospatial solutions that are specifically tailored to deliver efficiency and value to the project and City stakeholders.

While the scope and complexity of assignments will vary greatly, we also understand every potential work order must address the same four critical elements: Safety, Quality, Schedule, and Cost. Our management and production plans will focus on these aspects to deliver on your work capital improvement commitments to your residents.

- Safety We recognize that public road rights of way can be among the most dangerous work environments in the United States, while waterways and natural environments may contribute to additional on-the-job hazards. We are laser-focused on assuring the safety of the public and the safety of all our staff during field operations. Mobile survey technologies, such as mobile LiDAR and our unmanned hydrographic survey systems, pointedly enhance this objective by significantly reducing our staff's exposure to dangerous conditions. While each of our field staff maintains current FDOT Intermediate Maintenance of Traffic Training, and our senior field staff maintains a variety of OSHA training certifications, our innovative practices and industry-leading tools facilitate the best safety approach of all: complete removal of our staff from the danger.
- Quality The surveying and mapping products we deliver will drive planning and engineering decisions that may directly affect the total success of a project. Three items are essential in delivering a quality product on every assignment: a consistent and dedicated team; a Quality Control (QC) Officer with significant experience in the work being delivered; and a Quality Control Plan that proactively addresses the City's requirements while specifically meeting the needs of the work order Scope of Service.
- Schedule Qualified staff and/or technology resources must be assigned that will facilitate ontime delivery of each work order. These resources will be dedicated to the project and remain in place until the completion of the work. Schedules will be developed in consideration of the overall project production schedule, ensuring critical path survey deliverables are provided on time so that dependent tasks can be moved forward at the earliest possible time. On-time delivery also goes hand in hand with quality deliverables. Setting pre-submittal QC due dates that are considered the final due date is crucial in this regard.
- Cost Controlling cost while limiting risk and meeting the work order scope is the final key issue. This begins with our thorough scope development effort. A scope that includes all foreseeable project requirements and addresses the intended use of the survey data by downstream parties and stakeholders eliminates unbudgeted work from the assignment. The importance of experience cannot be overstated in this regard. Luis and his team have extensive experience in delivering survey services to municipalities across the state and know what questions to ask to ensure the full scope of required services is considered at the onset of the TWO. Appropriate data collection approaches are a contributing factor that further limits cost. Our mobile LiDAR, UAS and unmanned hydrographic survey vessels greatly reduce our personnel's "time on project," the largest factor affecting cost.

While is it impossible to expound upon the approach to any potential assignment we may receive throughout the contract, it is possible to touch upon the critical scope items included in the RFP.

Meetings: We recognize the value of face-to-face interaction in the development of scopes of work, issue resolution, or review of submitted material. Our responsible office is located only 20 minutes from the City's office, and Luis will be available to the City as needed to meet with interested parties and discuss items of interest. While we respect the City staff's time, we find it far more reasonable to jointly review potential concerns or judgments and obtain buy-in from interested parties before moving forward unilaterally if controversy may ensue.

Topographic Surveys: The scale and complexity of topographic surveys can vary dramatically according to the needs of the designer and the objectives of the overall project. The typical intention is to provide sufficient surface topography, elevations, and gravity systems data such as sewer and storm water facilities, to support the planning, design, and agency permitting needs of a future construction project. The key in terms of cost efficiency is a thorough understanding of the downstream use of the topographic data. Pavement-only roadway projects with no cross slope corrections or alterations to the existing vertical profile may only require 2D topography with 500' cross sections to nail down pavement quantities, while minor widening for bike lane additions, design of ADA compliance improvements, or drainage improvements may require a full 3D survey with Digital Terrain Model collected with mobile LiDAR. Improvements at parks or City facilities may include grid elevations at appropriate intervals to establish material quantities and locate all surface features and improvements. Similarly, we understand this work type will be a significant component of the contract and may be required at any site or location, from the parking lot of City Hall to the Port St. Lucie Botanical Gardens to one of your major downtown roadway arterials. KEITH has the experience to work with the designer to properly scope the project, implement the most cost-efficient collection tool, and deliver what's needed to support the initiative.

Utility, Easement, and Property Boundary Location: Boundary surveys and establishment of existing road rights of way are key components of the design plan production, property dedication or acquisition, and agency permitting on City projects. There are several critical aspects associated with correctly retracing property boundaries, rights of way, and easement locations:

Research - Thorough research is the cornerstone of a boundary retracement effort that accurately depicts ownership lines in relationship to recovered boundary monuments in the field. Before negotiation and after notification of an upcoming work order, KEITH will review all available information including City provided surveys, plats or previous construction plans/permits, property information on the Palm Beach Property Appraiser's site, FDOT right of way maps, and Palm Beach County right of way maps and surveys as available. Once all existing information is assembled, the project boundaries are calculated for field reconnaissance. If title research is required to facilitate real property transfers between the City and other government agencies or private adjoiners, that data will be reviewed following fieldwork and any potential encumbrances will be plotted on the survey.

- Calculations and Development of the Retracement Plan Deeds, plats, RW maps, and other documents of record that may control the project boundary are calculated in relationship to sectional data, certified corner records, and/or plat coordinates as necessary. The preliminary boundary and controlling corners are included with a Google KMZ for field crew location.
- Dedicated Field Crew Effort Experience in locating evidence of boundary locations is essential in any boundary survey. Original plat monuments, RW monuments or reference points, and sectional corners may be long buried and thoroughly searching for these points, even when not initially apparent, leads to the highest likelihood that all potential controlling corner evidence is located and documented in the field. Evidence of boundary occupation, such as fence lines, sidewalks, building faces, or railroad rails, are located to correlate the monuments to their respective legal lines.
- Drafting, Map Preparation, and Final Certified Survey Our Team is fully versed in field-to-finish automated feature mapping and digital delivery. If the City has specific "CAD templates" that govern the organization and presentation of surveys, these can be easily accommodated in our delivery process. We also recognize that map development is both an art and a science, and our teams take pride in presenting surveys that are consistent, highly readable, correct, and indicative of the quality we're known to deliver. The final submittal is a digitally signed and sealed PDF with accompanying CAD files depicting all subject properties, and adjoining ownership, and certified to the City following the guidelines established in Chapter 5J-17 of Florida's Administrative Code.

Parcel Sketches: Document support for easement acquisition, land transfers, temporary construction locations or staging areas, and minor traffic improvements are provided by Sketch and Description. While not a boundary survey, the sketch provides a visual representation that matches the real property description included with the document, with bearings, distances, acreages, and ties to physical monuments or established boundaries. The sketch content must match the dimensions and boundary calls of the legal description exactly, and the submittal is typically a digitally signed and sealed Adobe PDF by the requirements established in Chapter 5J-17 of Florida's Administrative Code.

Cross Sections: Road, levee, or canal cross sections provide the horizontal and vertical layout of those existing features and are crucial to the design of improvements on those systems. Crosssections may be obtained conventionally with our reflectorless total stations, or data collection may be expedited by using our mobile or airborne LiDAR systems to densify the cross-section interval or locate high and low points by development of a full terrain model of a corridor. In all cases, cross-section data is presented in a way that best facilitates the needs of the downstream user.

Record / As-Built Surveys: KEITH has a diverse background in as-built/record surveys. We have completed as-built surveys for projects such as highways/bridges, airport runways, well sites, water and sewer systems, levees, and building interiors in preparation for expert witness testimony or project/ permit closeouts. We use innovative approaches to expedite the process and remove this task from the closeout schedule at the earliest time. Mobile LiDAR represents an excellent way to as-built cross slopes and over-road clearances for signs or signals if needed, and UAS airborne LiDAR collection can be an ideal way to as-built stormwater retention facilities or parking areas. In each case, we will evaluate the as-built criteria for the project and provide a cost-effective and efficient approach to complete the requirement.

Specific Purpose Surveys: Typically, only special assignments will be categorized as Specific Purpose Surveys. Our experience on similar contracts indicates that most assignments will fall into other categories of survey (Boundary, Topographic, Control, etc.). However, specialized assignments such as documenting water control structure elevations, tree surveys supporting tree disposition plans, asset inventories, or subsurface utility surveys may fall into this category. In each case, the objective of the work will be discussed with the City to ensure the required information is captured and presented in a way that meets the needs of the project.

Property Staking and Monumentation: Physically monumenting property boundaries provides evidence on the ground to substantiate the boundary determination effort. All property or RW corners will be set with durable and permanent monuments after the retracement effort. We also understand that staking proposed improvements or new boundaries can be a critical aspect of design or public outreach during a project. When parcel staking for viewing is required, highly visible temporary markers or water-based paint are used. The staking effort is documented with digital photos and field notes to confirm the proposed boundary, easement, or alignment locations are placed in the field before the conclusion of the work effort.

Plan, Plat, and Legal Description Reviews: KEITH serves as a reviewer of record for several Florida municipalities, including the City of Lighthouse Point, the City of Pompano Beach, the City of Parkland, the City of Fort Lauderdale, and the City of Sanford. Our primary intent in document review is to ensure correctness and conformance with Florida's statutes including, F.S. 472, 117, 120, and 718 as required. KEITH has assisted each of the municipalities above with the development of checklists that expedite the review process, and provide consultants and developers with consistent submittal package requirements while ensuring all required criteria are checked and verified before the recommendation of approval.

GPS Mapping / Geodetic Control: Our QC Manager, Sam Hall, PSM, holds a Master of Science degree in GPS Satellite Surveying and Conformal Mapping, and has been a part of more than 20 projects that contributed nearly 150 new horizontal and vertical control stations to the National Geodetic Survey's (NGS) National Spatial Reference System (NSRS). Additionally, the KEITH Team has previously provided new Secondary Airport Control Surveys (SACS) at Fort Lauderdale International Airport and Pompano Park Airfield. These control stations govern the basis for all future surveys for improvements at these respective airfields. This experience leaves us ideally positioned to provide high-accuracy control surveying supporting new construction, structure monitoring, and sea-level monitoring of the City.

Laser Scanning: Dating back to our first purchase of a static scanner nearly a decade ago, KEITH has pioneered the use of this vital tool on a wide range of project types. Our investments in mobile LiDAR and UAS-based aerial LiDAR technology only further this commitment to remaining at the forefront of this emerging data collection approach. Eliminating the need to "stop, collect, code, store, repeat" when collecting topographic elevations or feature locations by implementing mobile survey technologies is arguably the most significant safety, accuracy, and cost savings development since the reliable use of GPS/GNSS survey systems was pioneered in the 1990s. We further understand that designers are now moving to 3D design processes, and our "Reality Capture" approach provides superior data for 3D design, all while cutting costs and compressing survey schedules. This expertise allows the replacement of a three/four-person crew with an advanced mobile LiDAR sensor or static laser scanning sensor and

residents is the successful operations of your water and sewer services. As a result, utility location can be a significant component of a contract such as this. When executed correctly and at the appropriate time in the design process, a subsurface investigation can identify and eliminate costly unforeseen utility impacts during construction. KEITH's in-house SUE Services Division is an extension of our Geospatial Division, and Sam will work hand in hand with Mark Mitchell, Director of Subsurface Utility Engineering, to scope and execute each SUE assignment. Our detailed approach to these services is as follows:

SUBSURFACE UTILITY LOCATING (CI/ASCE 38-02 QUALITY LEVEL A - TEST HOLE)

- Obtain a Sunshine 811 dig ticket covering the limits of the excavation.
- Develop a Maintenance of Traffic (MOT) plan by the FDOT Design Standards Index 600 Series and the Manual on Uniform Traffic Control Devices.
- Recover/verify horizontal and vertical survey control.
- When appropriate, stake the horizontal location of possible conflicts and proposed structures.
- Designate existing utilities using direct induction electronic methods and/or GPR and provide a passive electronic sweep for additional utilities.
- Neatly cut and remove pavement, if present, and vacuum excavate the test hole to visually confirm and record utility material composition on KEITH's Test Hole Datasheet. Excavation size not to exceed 144 square inches. Record utility depth (top and bottom) and size/diameter. For non-encased multi-conduit systems, record configuration and dimensions. Obtain a clear digital photograph of the utility and record the photo ID on the Datasheet. All depths to .1 feet and sizes to .05 feet by the Ci/ASCE 38-02 guidelines.
- Set a visual marker at the centerline of the utility and mark with the utility test hole number, material, size, and depth. These data are photographed and recorded by the survey crew and compared to the test hole reports as part of KEITH's standard SUE quality control procedure.
- Backfill and compact with original soil material and restore the excavation to its original condition or better. If necessary, warrant repairs on pavement for three years.
- Radially survey the test hole marker location from verified survey control and digitally record all utility information as staked/painted. Described benchmarks utilized in field notes.
- Obtain closeout permits after work.

SUBSURFACE UTILITY DESIGNATING (CI/ASCE 38-02 Quality Level B)

- Review available data as provided by the City and supplemental requests from UAOs.
- Develop an MOT plan by the FDOT Design Standards Index 600 Series and the Manual on Uniform Traffic Control Devices.
- Designate surface-accessible utilities using direct induction electronic methods. Record utility ownership data from available field indicators (pull box covers, manhole covers, drop shields, indicator posts, and similar infrastructure). Mark/flag utilities according to American Public Works Association (APWA) color guidelines.
- Provide a passive electronic sweep of the area to identify additional utilities and mark them accordingly. Designate existing utilities using direct induction electronic methods and/or GPR and provide a passive electronic sweep for additional utilities.
- Provide Ground Penetrating Radar (GPR) sweep to identify and mark additional non-toneable utilities. Set a visual marker at the centerline of the utility and mark with the utility test hole number, material, size, and depth. These data are photographed and recorded by the survey crew and compared to the test hole reports as part of KEITH's standard SUE quality control procedure.
- Prepare field notes and sketches and annotate marked plans with designated utility locations.
- Survey designates using cellular RTK GNSS, calibrated to verified survey control.

Utility data is typically then added to existing survey data, with a signed and sealed Surveyor's Report detailing our approach and methodology, the findings of the investigation, and any specific items that should be brought to the attention of the end user of the utility data.

Ability to Meet Required Timeframes: Many commitments must be made to assure on-time delivery - the availability of a depth of qualified staff; commitment from the project team to their tasks without interruption; scheduling software that identifies current and future resource commitments; and setting internal milestone QC review dates in advance of submittal deadlines. These commitments begin and end with our Deputy Project Manager/QAQC Officer, Sam. Sam is Vice President of the Firm and Geospatial Division Manager, and resource allocations are determined by him directly. We understand you take a risk in selecting a new consultant, and we pay specific attention to the trust you've given us by taking that risk. Sam and Dodie Keith-Lazowick, PLS, our Principal-in-Charge, is directly accountable to the City's staff. Together, they will ensure all required technical, professional, and technological resources are available to the City as needed on every assignment without exception.

Sam will enter all work orders into our internal Critical Path Method Scheduling software, detailing task duration, task completion, project milestone delivery dates, preliminary QC submittal dates, and final delivery deadlines. This database is flexible and can be adjusted "on the fly" if changes in the City's priorities or schedules require adjustments to our task delivery timelines. Work orders issued under this contract can then be overlaid on the scheduling commitments of the entire KEITH Geospatial Division. Sam can identify available resources or projects whose timelines permit a resource draw-down in favor of others with more aggressive schedules. Finally, Lee Cole, our Schedule Control Specialist, will work with Sam in tracking updates to schedules and ensure all data is correct. Updates in resource allocation and availability are tracked weekly, providing the highly informed basis needed to meet each established schedule. These processes have dramatically improved schedule compliance firm-wide, and we look forward to demonstrating the result of this commitment on this contract.

Project Research: As a long-standing provider of these services to South Florida municipalities and clients in Palm Beach County, we are deeply familiar with available data sources and systems that streamline our work. FDEP's LABINs provide horizontal and vertical benchmark information, tide station data, certified section corner documents, and historic government land maps that can be critical in boundary determination. St. Lucie County Property Appraiser's GIS provides a single map-based parcel catalog for each property in the city, and the underlying GIS shape files that drive this database can help identify title inconsistencies when property appraiser data may not match a calculated plat or parcel boundary. As a three-time holder of SFWMD's continuing surveying and mapping contracts, we have utilized their SIDERA database of project control on dozens of past projects, and have access to their online archive of digital survey data. FDOT District IV's EPIC database of project horizontal and vertical control and their Right of Way Maps Application are newly launched platforms that can be significant time-saving resources for existing data if projects are located near or adjacent to FDOT rights of way. The USGS's 3DEP Map Server also provides extensive aerial LiDAR datasets covering the City. These can provide a suitable basis for planning, and we have leveraged that tool for drainage basin analysis and large-scale road flooding analysis in the past.

Finally, the City itself will be a tremendous resource of existing data. Depending on project specifics, we may request drainage as-builts, permit plans, construction documents for past projects, previous surveys, or utility atlas data to expedite our work and build a thorough understanding of the existing information that will aid us in delivering a better product.

Web / Cloud-Based Solution Platforms: KEITH makes extensive use of cloud computing in our everyday survey operations. Our crews are equipped with Wi-Fi mobile hotspots that are continuously connected to our data collection systems. The collectors are connected to a virtual data storage environment through Trimble Access, a two-way cloud storage service. Newly collected data is written automatically to the cloud and can be accessed in real-time by our team, for instantaneous review of critical items. Similarly, our team can write new computational files, stakeout information, or alignment geometry to the cloud to be accessed by our field crews for project use. This cloud-based connectivity delivers tremendous efficiencies to our field operations while providing access to the most current datasets by all project professionals.

Similarly, our LiDAR systems generate large datasets depending on project size. TopoDOT, our LiDAR data management platform, includes a cloud-based portal that allows us to store LiDAR offsite while accessing the data seamlessly for survey CAD file development. Furthermore, this platform allows us to provide a web-based portal for our clients to review our LiDAR datasets and CAD working CAD files as they are developed and posted to the cloud. These tools provide us the flexibility to review progress or concerns jointly in a cloud-based environment at any time.

Quality Control Process: As stated earlier, we recognize the risk you take with awarding a continuing service contract to a new consultant. Simply put, our future success relies on the quality of the work we perform on current projects. Our entire team is committed to delivering a thoroughly reviewed, correct product that meets all technical requirements and fulfills the work order Scope of Service. With 23 years of experience, Sam Hall, PSM, will serve as Chief QA/QC Officer for this contract. His experience includes all levels of the surveying and mapping program, production, and QC management. Sam or his assigned QC surveyor for any work order will not be directly involved with production on the TWO they will QC. This provides them the independence and flexibility required to implement our proven QA/QC Plan and pair QC reviewers with specific technical experience with QC responsibilities. Our QA/QC Plan includes a color-coded system and QC tracking stamp that documents the individuals involved in both productions and provides dates of completion of checking and backchecking. Concurrence with redline markups, verification of change incorporation, and final approval are included in our process. KEITH will submit our formal Quality Management Plan at the execution of the contract for approval.

Additional aspects of our QA/QC Plan are related to the innovative survey technologies we anticipate implementing on this contract. We level through drainage structures and compare the leveled elevations to LiDAR-derived elevations following extraction. Checkpoints are collected randomly throughout a project to verify UAS photography or LiDAR-collected site elevations. Finally, we extract "bare Earth" lowest points of reflectivity throughout obscure areas that were conventionally collected, providing a direct comparison of mobile or static LiDAR data to data collected by other means. These KEITH QC innovations provide the highest probability that survey data will be correct before delivery.

Commitment: KEITH has provided the technical services above to Florida municipalities for over 60 years. Our longevity is routed in the pride we have in helping our partners execute the initiatives that improve the experiences of their residents and visitors. We understand that our success is dependent on yours and we are committed to meeting your expectations on every assignment. We are thrilled to have the opportunity to build upon that legacy of mutual success as one of the City of Port St. Lucie's Continuing Contract holders for Surveying and Mapping Services. We look forward to working with the City of Port St. Lucie on this exciting contract.

TAB 3 Certified Minority Business Enterprise

KEITH

To this day, KEITH remains a majority woman-owned business. We understand the importance of working with and supporting Small Business Enterprises (SBE) and Minority/ Women Business Enterprises (M/WBE). Supplier diversity makes for good business practices by providing opportunities for an inclusive procurement environment, recognizing the immense value in small, minority, and women business enterprises.

At KEITH, we are grateful for the opportunities that have been provided to our firm by being certified in many programs over the years. Because of these programs, KEITH has been able to grow in both size and revenue, allowing us the pleasure of graduating out of the programs and providing the same opportunity to other SBE and M/WBE firms. KEITH is proud to currently hold M/WBE Certifications with the following:

- City of Orlando
- City of Tampa
- City of West Palm Beach
- Osceola County
- Greater Orlando Aviation Authority (GOAA)
- Central Florida Expressway Authority (CFX)

KEITH previously held SBE and M/WBE certifications with the following:

- State of Florida
- **Broward County**
- Miami-Dade County Public Schools
- Palm Beach County Public Schools
- **Broward College**
- **Broward County Public Schools**
- Broward Health
- **FDOT**
- Miami-Dade County
- Palm Beach County

Owner and Chief Executive Officer, Dodie Keith-Lazowick, sits on a variety of committees dedicated to upholding the importance of such efforts. These committees include Broward County Economic and Small Business Development Advisory Board and the School Board of Broward County Minority and Diversity Participation Advisory Committee. Dodie is also committed to continue supporting and mentoring fellow local SBE and M/WBE engineering firms. KEITH has also begun the process of becoming certified with the Women's Business Enterprise National Council (WBENC) and the National Association of Women Business Owners. We look forward to celebrating our national certifications once the process is complete.

TAB 4 Additional Required Proposal Submittal Forms

CONSULTANT'S GENERAL INFORMATION WORK SHEET E-RFP #20230097

It is understood and agreed that the following information is to be used by the City to determine the qualifications of prospective Consultant to perform the work required. The Consultant waives any claim against the City that might arise with respect to any decision concerning the qualifications of the Consultant.

The undersigned attests to the truth and accuracy of all statements made on this questionnaire. Also, the undersigned hereby authorizes any public official, Engineer, Surety, bank, material or equipment manufacturer, or distributor, or any person, firm or corporation to furnish the City any pertinent information requested by the City deemed necessary to verify the information on this questionnaire.

NOTICE TO ALL PROPOSERS

To ensure fair consideration is given for all Proposers, it must be clearly understood that upon release of the proposal and during the proposal process, firms and their employees of related companies as well as paid or unpaid personnel acting on their behalf shall not contact or participate in any type of contact with City employees, department heads or elected officials, up to and including the Mayor and City Council. The "Cone of Silence" is in effect for this solicitation from the date the solicitation is advertised on DemandStar, until the time an award decision has been approved by City Council and fully executed by all parties. Information about the Cone of Silence can be found under the City of Port St. Lucie Ordinance 20-15, Section 35.13. Contact with anyone other than the Issuing Officer may result in the vendor being disqualified. All contact must be coordinated through Ms. Robyn Holder, Issuing Officer, for the procurement of these services.

All questions regarding this Solicitation are to be submitted in writing to Robyn Holder, Procurement Manager with the Procurement Management Department via e-mail rholder@cityofpsl.com, or by phone 772-344-4293. Please reference the Solicitation number on all correspondence to the City.

All questions, comments and requests for clarification must reference the Solicitation number on all correspondence to the City. Any oral communications shall be considered unofficial and non-binding.

Only written responses to written communication shall be considered official and binding upon the City. The City reserves the right, at its sole discretion, to determine appropriate and adequate responses to the written comments, questions, and requests for clarification.

*NOTE: All addendums and/or any other correspondence before bid close date (general information, question and responses) to this solicitation will be made available exclusively through the DemandStar's Website for retrieval. All notice of intent to award documentation will be published on the City Clerk's Website. Proposers are solely responsible for frequently checking these websites for updates to this solicitation.

I understand and shall fully comply with all requirements of City of Port. St. Lucie Ordinance 20-15, Section 35.13.

"A City for All Ages"

CONSULTANT'S CODE OF ETHICS

The City of Port St Lucie ("City), through its Procurement Management Department ("Procurement Management Department") is committed to a procurement process that fosters fair and open competition, is conducted under the highest ethical standards and enjoys the complete confidence of the public. To achieve these purposes, Procurement Management Department requires each vendor who seeks to do business with the City to subscribe to this Consultant's Code of Ethics.

- A Consultant's bid or proposal will be competitive, consistent and appropriate to the bid documents.
- ♦ A Consultant will not discuss or consult with other Vendors intending to bid on the same contract or similar City contract for the purpose of limiting competition. A Vendor will not make any attempt to induce any individual or entity to submit or not submit a bid or proposal.
- Consultant will not disclose the terms of its bids or proposal, directly or indirectly, to any other competing Vendor prior to the bid or proposal closing date.
- Consultant will completely perform any contract awarded to it at the contracted price pursuant to the terms set forth in the contract.
- Consultant will submit timely, accurate and appropriate invoices for goods and/or services actually performed under the contract.
- Consultant will not offer or give any gift, item or service of value, directly or indirectly, to a City employee, <u>City official</u>, employee family member or other vendor contracted by the City.
- Consultant will not cause, influence or attempt to cause or influence, any City employee or City Official, which might tend to impair his/her objectivity or independence of judgment; or to use, or attempt to use, his/her official position to secure any unwarranted privileges or advantages for that Vendor or for any other person.
- Consultant will disclose to the City any direct or indirect personal interests a City employee or City official holds as it relates to a Vendor contracted by the City.
- Consultant must comply with all applicable laws, codes or regulations of the countries, states and localities in which they operate. This includes, but is not limited to, laws and regulations relating to environmental, occupational health and safety, and labor practices. In addition, Consultant

must require their suppliers (including temporary labor agencies) to do the same. Consultant must conform their practices to any published standards for their industry. Compliance with laws, regulations and practices include, but are not limited to the following:

- Obtaining and maintaining all required environmental permits. Further, Consultant will endeavor to minimize natural resource consumption through conservation, recycling and substitution methods.
- o Providing workers with a safe working environment, which includes identifying and evaluating workplace risks and establishing processes for which employee can report health and safety incidents, as well as providing adequate safety training.
- Providing workers with an environment free of discrimination, harassment and abuse, which
 includes establishing a written antidiscrimination and anti-bullying/harassment policy, as well
 as clearly noticed policies pertaining to forced labor, child labor, wage and hours, and freedom
 of association.

DISCLAIMER: This Code of Ethics is intended as a reference and procedural guide to Consultants. The information it contains should not be interpreted to supersede any law or regulation, nor does it supersede the applicable Consultant contract. In the case of any discrepancies between it and the law, regulation(s) and/or Consultant contract, the law, regulatory provision(s) and/or vendor contract shall prevail.

E-Verify Form

Contractor acknowledges and agrees to the following:

- Shall utilize the U.S. Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the Supplier/Consultant during the term of the contract; and
- Shall expressly require any subcontractors performing work or providing services pursuant to the state contract to likewise utilize the U.S.
 Department of Homeland Security's E-Verify system to verify the employment eligibility of all new employees hired by the subcontractor during the contract term.

DRUG-FREE WORKPLACE FORM

The	undersigned Contractor in accordance with Florida Statute 287.087 hereby certifies that KEITH does:
	(Name of Business)
1.	Publish a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the workplace and specifying the actions that will be taken against employees for violations of such prohibition.
2.	Inform employees about the dangers of drug abuse in the workplace, the business's policy of maintaining a drug-free workplace, any available drug counseling, rehabilitation, and employee assistance programs, and the penalties that may be imposed upon employees for drug abuse violations.
3.	Give each employee engaged in providing the commodities or contractual services that are under proposal a copy of the statement specified in subsection (1).
4.	In the statement specified in subsection (1), notify the employees that, as a condition of working on the commodities or contractual services that are under proposal, the employee will abide by the terms of the statement and will notify the employer of any conviction of, or plea of guilty or nolo contendere to, any violation of Chapter 893 Florida Statutes or of any controlled substance law of the United States or any state, for a violation occurring in the workplace no later than five (5) days after such conviction.
5.	Impose a sanction on, or require the satisfactory participation in a drug abuse assistance or rehabilitation program if such is available in the employee's community, by any employee who is so convicted.
6.	Make a good faith effort to continue to maintain a drug-free workplace through implementation of this section.
	person authorized to sign the statement, I certify that this firm complies fully with the above ements. Bidder's Signature

Dodie Keith-Lazowick, PLS
CEO
301 E Atlantic Boulevard
Pompano Beach, FL
954.788.3400
DKeith@keithteam.com

Sections 287.135 and 215.473, Florida Statutes, prohibit Florida municipalities from contracting with companies, for goods or services over \$1,000,000 that are on either the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or to engage in any Business operations with Cuba or Syria. Sections 287.135 and 215.4725 also prohibit Florida municipalities from contracting with companies, for goods or services in any amount that are on the list of Scrutinized Companies that Boycott Israel.

The list of "Scrutinized Companies" is created pursuant to Section 215.473, Florida Statutes. A copy of the current list of "Scrutinized Companies" can be found at the following link: https://www.sbafla.com/fsb/FundsWeManage/FRSPensionPlan/GlobalGovernanceMandates/QuarterlyReports.aspx

As the person authorized to sign on behalf of the Respondent Vendor, I hereby certify that the company identified above in the section entitled "Respondent Vendor Name" is not listed on either the Scrutinized Companies with Activities in Sudan List; or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List; is not participating in a boycott of Israel; and does not have any business operations with Cuba or Syria. I understand that pursuant to Sections 287.135 and 215.473, Florida Statutes, the submission of a false certification may subject the Respondent Vendor to civil penalties, attorney's fees, and/or costs.

I understand and agree that the City may immediately terminate any contract resulting from this solicitation upon written notice if the company referenced above are found to have submitted a false certification or any of the following occur with respect to the company or a related entity: (i) for any contract for goods or services in any amount of monies, it has been placed on the Scrutinized Companies that Boycott Israel List, or is engaged in a boycott of Israel, or (ii) for any contract for goods or services of one million dollars (\$1,000,000) or more, it has been placed on the Scrutinized Companies with Activities in Sudan List or the Scrutinized Companies with Activities in the Iran Petroleum Energy Sector List, or it is found to have been engaged in business operations in Cuba or Syria.
