6.2 Termination for Convenience. Either party may terminate this Agreement in whole or in part, with or without cause at any time for convenience upon thirty (30) calendar days' prior written notice to the other party. SOUTH FLORIDA WATER MANAGEMENT DISTRICT EXHIBIT B STATEMENT OF WORK

Floresta Baffle Box

A. INTRODUCTION/BACKGROUND

Governor Ron DeSantis and the Florida Legislature provided¹ \$25 million for a water quality improvement projects grant to benefit the Indian River Lagoon (IRL). Projects were eligible for maximum funding of \$2.5 million per project or per applicant. The IRL watershed includes areas within the jurisdictional boundaries of the St. Johns River Water Management District (SJRWMD) and the South Florida Water Management District (SFWMD) (Figure 1). The SJRWMD and SFWMD evaluated proposed water quality improvement project applications that maximized the potential for water quality improvement benefits, e.g., total nitrogen (TN) and total phosphorus (TP) nutrient load reductions, to the IRL. Projects were scored according to agency agreed upon evaluation criteria, and the results were endorsed on November 18, 2020 by the Florida Department of Environmental Protection.

STATEMENT OF WORK

Out of the 15 project applications received within the SFWMD’s jurisdiction, 9 projects were selected to be awarded grant funds totaling \$8,303,927 (Figure 2). On December 10, 2020, the SFWMD Governing Board approved entering into agreements with grant eligible entities under the IRL grant program. The City of Port St. Lucie is one of the grant recipients, \$672,472, for its Floresta Baffle Box Project.

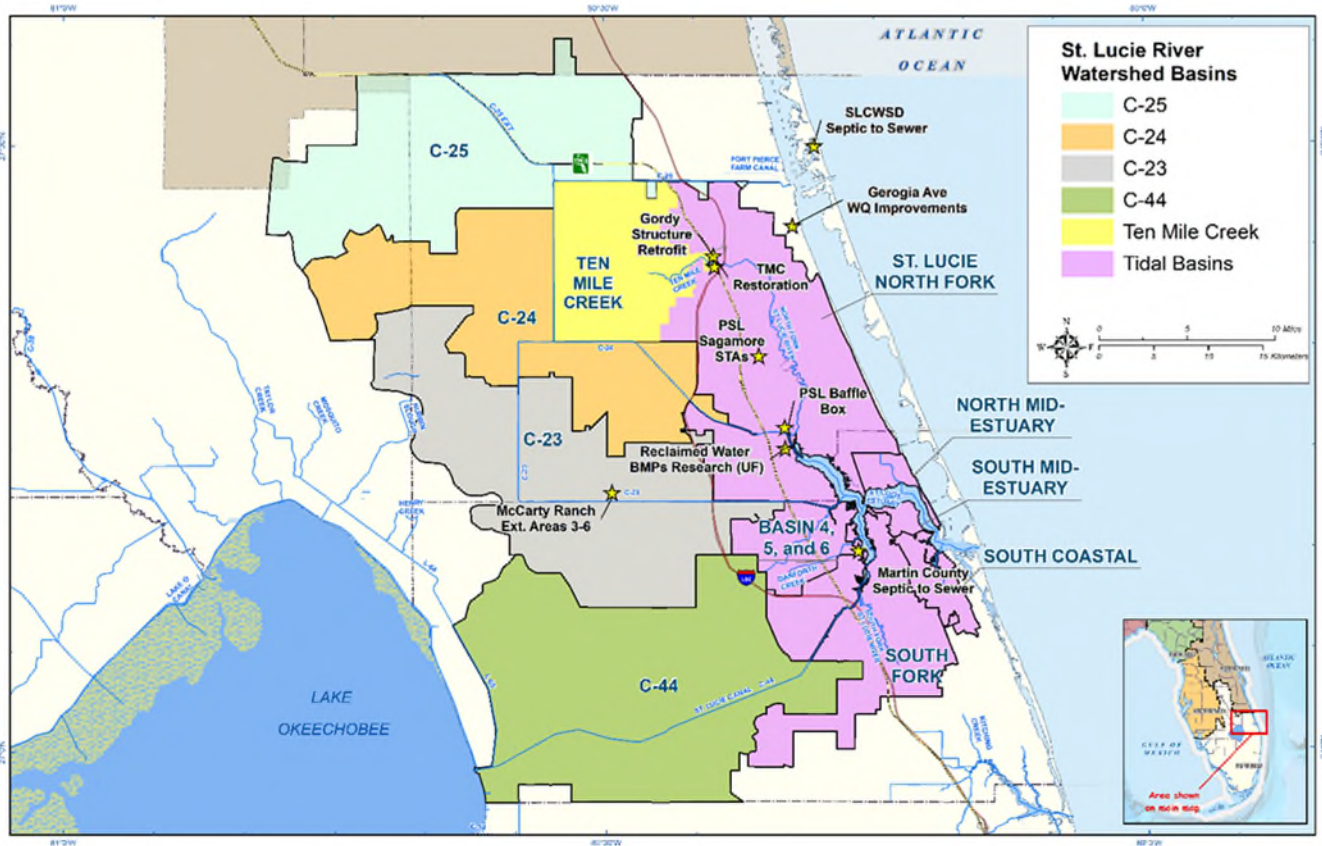

Figure 2. Selected IRL Grant Projects within SFWMD Area

The City of Port St. Lucie surface water management facilities were originally designed to provide drainage and flood protection. Water quality treatment was not a primary objective. The proposed project is part of a city-wide effort of retrofitting the surface water management system through the installation of baffle boxes. Baffle boxes are concrete or fiberglass structures containing series of sediment settling chambers, separated by baffles. The project is located at the Kingsway Waterway outfall, (Lat. 27.266950, Long. -80.333547), on Floresta Drive in the City of Port St. Lucie, Florida (Figure 3).

B. OBJECTIVES

The project objective is to retrofit the Kingsway Waterway outfall with baffle boxes to reduce nutrient discharges in runoff from the Floresta Basin. The expected nutrient reductions of TN and TP are 19% (835 pounds/annually) and 16% (104 pounds/annually), respectively. The project will also reduce Total Suspended Solids (TSS) by 70% (61,615 pounds/annually).

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

EXHIBIT B

STATEMENT OF WORK

Figure 3. Baffle Box Location at the Kingsway Waterway

C. SCOPE OF WORK

The project will retrofit the surface water management system serving the Floresta Drive Drainage Basin (773 acres) through the installation of Type II baffle boxes upstream of the Kingsway Waterway outfall to the North Fork of the St Lucie River. The grant application indicates that the Recipient will implement a water quality monitoring program to verify project success. Specifically, the City’s Public Works Department will analyze the concentrations of pollutants in the stormwater discharging from the Kingsway Waterway and a baffle box maintenance plan. The baffle boxes will be cleaned (vacuumed) monthly and before and after every notable rain event during the wet season. The sediment load removed will be measured and the nutrient load reduction will be estimated. Staff will provide the baffle

box maintenance log indicating the sediment load and nutrients removed with the Quarterly Status Report.

D. WORK BREAKDOWN STRUCTURE

The work breakdown structure associated with this project is described below.

Task 1: Design, Permitting, and Monitoring/ Maintenance Plan

The Recipient shall be responsible for completing and obtaining final project design, construction plans, and specifications; obtaining all required permits (including the right of access to the project sites) related to project construction and subsequent operation and maintenance of the completed work; and assuring compliance with all permits and permit conditions.

The Recipient shall submit to the project manager an electronic submittal of the following documents, as applicable:

1. Copies of applicable permits,
2. Final engineering design documents issued for construction, such as engineering plans, technical specifications, drawings, and construction level details. The technical specifications will include a description of the evidence that will be required to show that the contractor has furnished and/or installed the item of work per the technical specifications,

- e. If the agreement allows for the separate billing of travel costs such costs must comply with the District's travel policy which includes the submission of a completed District provided *Travel Expense Reimbursement* form along with documentation of all travel expense items listed on the form.
