2. The Contractor shall perform work in accordance with the Monthly Schedule issued by the Project Manager, or his/her designee.
3. The Contractor shall deliver daily VIA email, facsimile, or in person, a detailed work schedule to identify the specific work in progress to the Project Manager or his/her designee.
4. **Maintenance of Swale Liners**
 - 4.1 If the liner is under water, the City suggests that the Contractor start at the outfall and work their way back to the beginning of the block. This will alleviate any blockage in the liner, however, the Contractor is responsible for the methods and means to perform this scope of work.
 - 4.2 Contractor shall edge the liner during each rotation.
 - 4.3 Contractor shall weed eat along the liner if necessary.
 - 4.4 Contractor shall shovel out and remove any and all debris, i.e., sand, grass clippings, & debris from all the liner. At the end of each daily work shift, all accumulated material must be dumped at the City designated site, unless prior

approval by the Project Manager or his/her designee to temporarily leave along the City right of way is authorized. If the City allows overnight storage of material, they are to be secured with DOT reflective cones. The site must be restored to equal or better condition, which may require replacement sod within twenty-four (24) hours. This decision will be at the Project Manager's or his/her designee's discretion. Seeding is not an acceptable restoration tactic.

- 4.5 The City will provide the site where debris shall be hauled to. The Contractor will be required to provide cubic yard reports of debris removed at the beginning of the following work week.

If swale liner is observed to be damaged as a result of an improved property, the Project Manager or his/her designee will forward the violation to Code Enforcement. Individual replacements that exceed 20 feet in length must be forwarded to the Project Manager. These areas will be repaired by City staff.
- 4.8 The Contractor shall not travel over any driveways during the course of the cleaning operation. Additionally, the City discourages driving equipment onto the swale of improved properties when retrieving accumulated debris. If the swale area becomes disturbed the Contractor will immediately repair to the same or better condition which may include installing new sod at the Project Manager's, or his/her designee's discretion. Seeding is not an acceptable restoration tactic.
