

J. CARVALLO

<https://www.instagram.com/jcarvallo.art/>

Miami Based Contemporary artist.

(b.1979) Graduated from University of Miami School of Architecture.

Architect and Artist with over 20 years of experience in the design field, who has always had a passion for art. As a plastic artist started his career learning from expressionist and contemporary artists in Venezuela such as Pablo Griss and Jorge Stever with whom he shared many years of apprenticeship. In 2005, he moved to Florida and still continues to grow his career as an artist and designer.

"I express the need to deeply observe and take in what I see with my eyes, the need to add temporality to perception by fooling my mind into creating movement where there isn't. The need to stop and watch carefully, and then go back to make sure what I saw can be seen again, the creation of an experiential moment that makes the spectator stop and spend at least a few seconds understanding what I have created to later realize that no two times the experience will be the same. Adding temporality to perception by fooling your mind into creating movement where there isn't. That is my drive to create.

My work is the result of an amalgamation of thorough technical and stylistic study of great OP Kinetic masters, blended with the intentional use of color to evoke feelings, giving my work a temporal space with a language of its own"

Carvallo Has participated in solo and group exhibits in USA and EUROPE, latest projects include:

- Gatlin Point Art Project. Installed in Port Saint Lucie, FL early 2024.
 - COLLECTIVE. Dennis Leon Gallery. 2023.
